

LICAD® is the worldwide leading software for support design

With LICAD® the user can generate true to scale support drawings and bill of materials within minutes. As Plug-In LICAD® is available for different 3D planning systems which are common in the plant construction.

Experience has shown that with LICAD® up to 50% of the support design costs can be saved. The time between design and delivery is also considerably reduced.

LICAD® 10.3 sets new standards and offers much improved intuitive handling plus a range of new funtions!

Besides the new features in Version 10.3 LICAD® is prepared for use in a network environment.

LICAD® offers a huge range of interfaces and component libraries. This enables the efficient exchange of data and smooth operation.

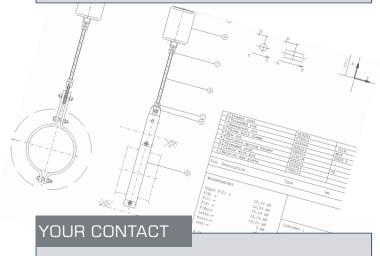

Interfaces / component libraries are available for:

AutoCAD®, Autodesk | AutoCAD® Plant 3D, Autodesk | TEKLA® Structures, Trimble | MicroStation®, Bentley Systems | Intergraph Smart® 3D, Hexagon® | SUPPORT MODELER®, Hexagon® | E3D®, AVEVATM | ROHR2, Sigma® | CAESAR II®, Hexagon® | CadWorx®, Hexagon®

LICAD® is available free of charge to our customers.

HIGHLIGHTS OF VERSION 10.3

- Snubbers with long strokes (up to 500 mm / 20 inch)
- New clamp types 34, 37, 44, 48 and 49 for diameters up to 1800 mm / 70 inch
- Dynamc riser clamps type 34
- New constant hangers type 127x15 (for use up to 140 kN / 31500 lbs)
- Increased surface protection for different fields of application as defined by DIN EN ISO 12944 (C3, C4, C5)
- Fix point clamps
